## Revolutionary New Power Catamaran

*(available with optional Inflatable Sail)*

*Imagine the versatility of sailing under a mastless, fully stowable inflatable sail similar to the sails recently pioneered by youthful kite-surfing enthusiasts. No running rigging. Not even any standing rigging. Nothing to reveal your hidden sailing capabilities. Revolutionary! Visionary!*

Yes, the Power Kit-Cat™ shown in these photos is a custom vessel equipped with two powerful 225 HP 4-stroke Honda outboard engines for use when operating as a luxury power catamaran. And operated as a power catamaran, the fully commissioned vessel easily achieves a cruise speed of 28 to 30 knots, even at low power settings. [1/2 fuel (330 gallon capacity) and full water (110 gallons), and with up to 10 adults on board]. The impressive features and capabilities of this boat would keep many owners content with either the power- or trawler- cat configuration (utilizing twin 50 to 225 HP outboard engines).

But during the summer of 2003, this extraordinary vessel will pioneer a revolutionary new type of sailing. Leisure sailing with a custom-built, inflatable, steerable sail is scheduled along the beautiful east coast of Florida, utilizing an easy-to-operate inflatable sail engineered with proprietary technologies derived from modern kite-surfing and skydiving. When operated under sail alone, without power, cruise performance is anticipated in the 15 knot range.

Using components provided in the comprehensive Kit-Cat™ custom catamaran package, this vessel can be easily built even by first-time owner/builders who want to create a custom boat specially assembled to meet their own individual requirements. No special skills are needed -- anyone with the desire and motivation can achieve their dreams with the affordable Kit-Cat™ process.

With personalized touches and many fine details — your Kit-Cat™ can be everything YOU want it to be. That's the great thing about building a Kit-Cat™. Your Kit-Cat™ will be the ideal boat for you in a way that no "off-the-shelf" production boat could ever be. You will build this boat yourself, with professional hired help when you want it. You've been around boats for a long time, and you know exactly what you're looking for. You want lots of room and comfort. You want a quiet, efficient boat that will cruise fast without sacrificing comfort. If so, then a Kit-Cat™ is the perfect fit for you. It has the speed and style of a great catamaran, combined with the large deck space of an old-fashioned pontoon party boat. Whether you are cruising under power or sail, this boat enables you, your family, and your friends to enjoy every minute on the water.
